

**BLUE RIVER RESOURCES LTD. ENTERS INTO AGREEMENT WITH  
GLOBAL SATELLITE INTEGRATION LTD.**

**Vancouver, BC – July 9, 2018 – Blue River Resources Ltd. (the “Company” or “Blue River”) (TSX Venture – BXR)( OTC: BRVRF) (Frankfurt : OBL) (<http://www.blueriv.com>)** is pleased to announce that it has entered into an agreement with Global Satellite Integration Ltd. (“GSIL”) for the acquisition by Blue River of a 30% interest in the share capital of GSIL for total cash consideration of \$50,000. GSIL is a private British Columbia company based in Vancouver, BC. GSIL provides satellite bandwidth and related services to mining companies. The acquisition includes a participation right for Blue River to retain its post-acquisition pro-rata interest in GSIL should GSIL issue further equity as well as the grant to Blue River of a right of first refusal by the two current shareholders of GSIL. The transaction has been accepted for filing by the TSX Venture Exchange.

According to Griffin Jones, Blue River’s President, “We believe that GSIL and its management have extensive experience working with mining companies and governments to provide internet and telecommunications access to mining companies regardless of their location. Blue River recognizes that stakeholders in the mining field such as local governments and the surrounding community of a mine site or a large exploration site require some level of corporate social responsibility from mining companies as part of gaining the “social license” to explore and exploit natural resources.”

Griffin Jones continues stating that “In our view, GSIL can bring internet and telecom access to communities, regardless of their location, thereby enhancing Blue River’s relationship with the local communities in which it plans to conduct exploration or mining activities. Blue River believes that having an ownership stake in GSIL’s expertise will enhance its ability to bid for or acquire mineral concessions and the required exploration or mining permits even in the most remote areas of the world.”

Blue River’s main focus remains mineral exploration. The Company continues to explore its Castle Copper Project near Princeton, BC, on which the Company has recently received a NI-43-101 report recommending a two-phased exploration program.

ON BEHALF OF THE BOARD
